REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The closest prior art is Strahsner (Austrian Pat.No.191006) which teaches a rotor winding support block comprising a first support block half 1 generally rectangular in shape and having a rectangular recess (not numbered; Figs.1&3) disposed in one facing surface; and a second support block half 2 which mates with said first support block half. However, Strahsner fails to teach or suggest a spring fitting in the rectangular recess, between the first and second support blocks 1 and 2. Neither does the remaining prior art of record teach a spring located between support blocks forming a salient rotor pole. Baldwin, Prechtl (DE 1003341) and Depser (DE 710,116) teach springs used on stator salient pole constructions, but none are located in a recess, between two support block pieces of a rotor.
2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Burton S. Mullins whose telephone number is 305-7063.
